

# MOHAMMED SAHL

mohammedsahl.dev · mskably@uwaterloo.ca · in/mohammed-sahl · mohammedsahl

## SUMMARY

---

- Experience with gRPC, Android development, Salesforce, full-stack frameworks, scripting and compilers
- Python, JavaScript, TypeScript, C/C++, Java, Kotlin, Go; React/Redux, Sails/ExpressJS, Cypress

## EXPERIENCE

---

### Software Developer

Google

(Remote) Waterloo, ON

January 2022 - April 2022

- Working on streamlining the config file generation process by building internal services using Go

### Android Developer

Wonolo

(Remote) Waterloo, ON

September 2021 - December 2021

- Reduced tax form request times by **3 hours** by adding a self-service screen using Jetpack Compose
- Improved team agility and mitigated technical debt by adding Moshi parsing to core app models
- Increased percentage of crash-free users by **0.5%** over several app releases by diagnosing & fixing **20+** bugs

### Salesforce Developer

Manulife

(Remote) Waterloo, ON

January 2021 - April 2021

- Revamped dataflow pipeline with Apache Nifi increasing reliability in data transfer from SFTP to Salesforce
- Programmed Apex Batch classes and Triggers to process **20,000+** records across several campaigns
- Dropped application load times by **57%** by converting to a stateful architecture for event propagation

### Software Engineering Fellow

Major League Hacking

(Remote) Waterloo, ON

May 2020 - August 2020

- Built a RESTful back-end server and testing framework for **v2** of a JavaScript transpiler sandbox
- Developed a word processing document parser and contributed to a spreadsheet data toolkit
- Added E2E tests using Cypress helping validate UI and server requests for a documentation generator plugin

### Quality Engineer

WorkMarket

Toronto, ON

May 2019 - August 2019

- Expedited build and release pipeline by **25x** by automating repetitive test cases using Espresso
- Developed software test plans for the Android platform increasing case coverage by **30%**
- Reduced employee on-boarding times by **4x** by consolidating documentation into a single repository

## PROJECTS

---

### Babel-Repl | JavaScript, React, SailsJS, Supertest

- Engineered a sandbox that transpiles code from ES6 to ES5 syntax with custom plugin and config support
- Introduced functionality to save and fork blobs, view AST with syntax highlighting and transpile history
- Implemented back-end and testing infra using SailsJS's MVC framework

### C-Compiler | C++, Assembly, Bash

- Created a compiler that scans, parses and generates executable files from C source code
- Implemented loops, variable assignment, function definitions, conditional, arithmetic and return statements
- Uses LR(1) NFA parsing to analyse a context-free language and produce derivation for a given string

### WordJS | TypeScript, PowerShell

- Architected a word processing document library with **1.2k+** stars, **200+** forks and **402k+** weekly downloads
- Implemented logarithmic time file type detection by using trie data structure to process file signatures
- Developed a file-type agnostic XML handler to parse through text blocks for unzipped files

### Auto-Repo-Struct | React, TypeScript, TSX

- Authored a plugin to allow users to visualize, in tree form, repository structures on Github

## EDUCATION

---

### University of Waterloo

Bachelor in Computer Science (Co-op)

Waterloo, ON

September 2018 - April 2023
