MOHAMMED SAHL

 $mohammedsahl.dev \cdot mskably@uwaterloo.ca \cdot in/mohammed-sahl \cdot mohammedsahl$

SUMMARY

- · Experience with full-stack frameworks, server-side applications, scripting, open source and compilers
- · JavaScript, TypeScript, Python, C/C++, Rust, Java; React/Redux, Sails/ExpressJS, Redis, Cypress

EXPERIENCE

Major League Hacking

(Remote) Waterloo, ON

Software Engineering Fellow

May 2020 - August 2020

- · Built a RESTful backend server and testing framework for v2 of a JavaScript transpiler
- · Developed a word processing document parser and contributed to a spreadsheet data toolkit
- · Added E2E tests using Cypress helping validate UI and server requests for a documentation generator plugin

WorkMarket

Toronto, ON

M. 2010 A. 4 2010

 $Quality\ Engineer$

May 2019 - August 2019

- · Sped build and release pipeline by 25x by automating repetitive test cases using Espresso
- · Developed software test plans for the Android platform increasing case coverage from 62% to 87%
- \cdot Reduced employee on-boarding times by 4x by consolidating documentation into a single repository

Brand Lounge

Web Designer

June 2017 - August 2017

· Decreased website load times by 20% by introducing caching into the server of a website with 500+ pages

PROJECTS

Biquadris - C++, Bash

- · Programmed a two player Tetris clone with revamped block generation, level difficulty and player abilities
- · Devised special actions, triggered by clearing multiple rows allowing user to negatively influence opponent
- · Formulated level specific block generation using various software engineering design patterns

Babel-Repl - JavaScript, React, SailsJS, Supertest

- · Engineered a sandbox that transpiles code from ES6 to ES5 syntax with custom plugin and config support
- · Introduced functionality to save and fork blobs, view AST with syntax highlighting and transpile history
- · Implemented backend and testing infra using SailsJS's MVC framework

C-Compiler - C++, Assembly, Bash

- · Created a compiler that scans, parses and generates executable files from C source code
- · Implemented loops, variable assignment, function definitions, conditional, arithmetic and return statements
- · Uses LR(1) NFA parsing to analyse a context-free language and produce derivation for a given string

WordJS - TypeScript, PowerShell

- $\cdot \ \, \text{Architected a word processing document library with 1.1k+ users, 190+ forks 136k+ weekly downloads}$
- · Implemented logarithmic time file type detection by using trie data structure to process file signatures
- · Developed a file-type agnostic XML handler to parse through text blocks for unzipped files

${\bf UtilBot} \text{ - } Rust, \, Postgre SQL, \, diesel$

- \cdot Built a full-stack discord bot that profiles users and serves bash-like instructions
- · Added commands for server members to ask questions and get replies from users matching its characteristics

${\bf Auto\text{-}Repo\text{-}Struct}\text{ - }\textit{React}, \textit{TypeScript}, \textit{TSX}$

· Authored a plugin to allow users to visualize, in tree form, repository structures on Github

EDUCATION

University of Waterloo
